

Privacy Policy

njb design® is dedicated to guarantee the protection of your personal data within all online services and to respect your choice regarding usage of personal data.

The following information is intended to give you a simple overview of what personal data is generated when using online services, how it is collected and evaluated by njb design® and / or third-party providers, and what options you have, to manage it.

Personal data can contain information about yourself, the hardware and software you use and their settings.

Sources

When you visit a website, personal data such as IP addresses, the type and settings of the Internet browser and operating system used, and the time of the page view are sent to web servers, which provide the content of the website you are visiting.

When using web forms, personal data such as e-mail addresses, usernames, passwords, names, addresses, telephone numbers and messages can also be transmitted.

In case of contact forms, the personal data is sent to an e-mail address defined by the owner of the website and stored in a mail server. In case of registration forms, the data is stored in a database and in case of login forms, the data is compared with previously stored data for verification.

Usage

Personal data is primarily used by njb design® to guarantee the functionality and security of online services. The transmission and storage of personal data are essential when using online services.

For statistical and analysis purposes, njb design® stores personal data exclusively in anonymous form.

Personal data will only be used for marketing purposes with your express consent.

Management

You have the right to receive information about the origin, recipient, and purpose of your stored personal data free of charge. In accordance with the legal requirements, you also have the right to correct, restrict processing or delete your data.

Third Party Technologies

The following third-party technologies are used for online services of njb design®:

djangoeurope

When using websites, services from djangoeurope are used for webhosting purposes. In this case djangoeurope's privacy policy and terms of service apply, which you can review under the following link:
